---

PROFILE

Front-End Developer with ability to build fully accessible responsive applications. I build a web presence from the ground up - from concept to UX. I am skilled at writing well-designed, testable, and efficient code using best practices in web development.

SKILLS

- HTML5 JavaScript Responsive Design GitHub Regex
- CSS3 jQuery REST APIs Firebase Bootstrap
- SASS React.js Web Accessibility Cross-Browser tests SQL

RECENT PROJECTS

Firefox UI improvements: | Mercurial | HTML | CSS | JavaScript | Working in a distributed team.
As an applicant of the Outreachy program, I made multiple contributions to the Firefox desktop application for the Proton redesign. I was added to the Add-on Contributor Recognition list for improving the add-ons UI.

Travis Poker Timer | React | HTML | CSS3 | Semantic-ui | Git
I helped the team to make the web application fully responsive, recreating the desktop design to adapt to multiple devices.

One Memory | React | Firebase | CSS3 | Git
If you ever feel like you want to share your most treasured souvenirs with the world, One Memory is for you. oneMemoryApp was built using React, styled with CSS3, and uses Firebase to store data collected from the user. https://luztherose.github.io/oneMemoryApp/
